Photos Storyboard 3

If the user logs in as a standard user, they are greeted with this window. The list view displays the name of created albums, the number of photos they contain and the range of dates. The user can logout or quit the application. The add album and edit name buttons will display a small prompt when clicked on for the user to enter in the relevant information.

Image View

If the user presses the open album button, they'll be taken to this window. This window will display the picture thumbnails on the left with the image they currently want to view on the right. (Note: There will also be a go-back button to return to the user-submenu that is not displayed in the picture.)
